15.c Ignition Lead Sets, table assorted

In this catalog assembly we have compiled the ignition cable sets that can be used for R/C107. Please click in the appropriate table field, further information below.

Haupt-Kriterium Anschluss zur Verteilerkappe

Setts

bitte in das jeweilige Tabellenfeld klicken

Zylinderzahl	Abgänge Verteilerkappe	Abgänge Verteilerkappe	Abgänge Verteilerkappe
6-Zylinder →	Einsteckbuchsen ("Push On")	Gewindestifte zum aufratschen ("Screw On")	Taillierte Pins ("SAE")
8-Zylinder →	Einsteckbuchsen ("Push On")	Gewindestifte zum aufratschen ("Screw On")	Taillierte Pins ("SAE")

Compatibility with the distributor cap is the main criterion to avoid bad purchases. Many causes can lead to the presence of an unexpected distributor cap for combination with the cable set: Completely replaced distributors, supply bottlenecks or manufacturer-side modernization of distribution caps. We kindly ask you to take a look under an ignition cable end installed on the distributor side before ordering. For reasons of the production number, SL cable sets are usually based on the sedan variant, in almost all cases this results in a negligible excess length of the high-voltage line from the ignition coil. Sentence-by-sentence comparison numbers (reference numbers) on the part of Mercedes-Benz or Bosch exist only in a few exceptions, specialist companies can also tend to buy individual cables or individual parts after diagnosis, even contrary to the aftermarket sets, please visit our assembly ...Mercedes W111 W108 W11415.b Ignition15.f Parts for self-assembly ...

15.i Info Spark Plugs

15.i Info Spark Plugs

Die Kerzentypen Bosch W5... bis W8... können Sie bei uns bestellen, wie auch die NGK BPR... bis BP5...

Die Tabellen zeigen Auszüge aus den Hersteller-Empfehlungen. Ein Ausweichen auf einen "benachbarten" Wärmewert-Index kann sinnvoll sein, je nach Einsatzbedingungen und Zustand von Motoren.
 Bosch: Hohe Kennziffer = heiße Kerze = schnelles Fröhrenn
 niedrige Kennziffer = kalte Kerze = geringe Gefahr von Glühzündung
 NGK: u m g e k e h r t

22 b. Engine rubber mount variants

The hole pattern in the subframe, which has remained unchanged over the construction period, allows engine conversions, provided that the engine rubber mounts and engine arms are selected to match the engine. No hydromounts in type 107. Replacements of rubber bearings within a design result in slightly changed damping or height-per-load properties, as well as the differences between products. (Guideline: seat of the motor arm above support (HII) from Gen II approx. 46.5 +/-1.5 unloaded, with Gen I approx. 56.0). We look forward to receiving the most complete vehicle information possible when you make your enquiry. The height position of the engine can be easily evaluated by the fit of the fan blade in its frame, under normal load on the front axle: When sighted on the two-column lift, the engine sags slightly with the subframe, this also applies to the prop shaft alignment.

24 c. Variations of engine damper and fitment bits

24 c. Variations of engine damper and fitment bits

Motordämpfer verändern sich nicht streng nur nach Erstzulassung oder Baumuster:
Landesausführungen wie Krümmer-Katalysatoren oder schleichende Baumusteraktualisierungen erschweren die schnelle Bestimmung. Falls Sie uns keine vollständigen Fahrzeugdaten anbieten können, ist die ausgezogene Gesamtlänge des Altteils (im Bild "max") die nächstbeste Identifikationshilfe.

Lieferumfang:
Dämpfer je 1 Stück ohne Montagekleinteile,
Montagekleinteile in Sets oder einzeln.

27.a Automatic to 03.80: K4A, W4B, W3A, W3B

The gearbox number is, for example, stamped at the edge of the base and/or can be found on a type plate; it usually starts with the aggregate type 722.xxxx. and the country version may be relevant. For spare parts inquiries, we ask you to provide this data. Your vehicle data card also shows the transmission number at the factory delivery.

33 Front suspension

Große Modelländerung 1985, offiziell per 01.08.1985, jedoch mit Abweichungen: 280/380SL alte Radaufhängung, 300/420SL neue Radaufhängung. 500SL spätestens ab FG 034907, in Vorserie einzelne FG auch früher. Nachrüstung möglich, sofern alle Teile (Lenker bis Naben) zusammen. Die Geometrie des zentralen Achsträgers (vom "Strich Acht" stammend) ist durchgängig unverändert, erhielt aber Verstärkungen während der 107-Bauzeit und kleine Änderungen bei 280-RHD.

Erkennungszeichen Radaufhängung "früh": Dreieckslenker komplett aus Stahlblech mit demontierbaren Kugelgelenken, die auch als Einzelteil erhältlich sind. Tausch des oberen Kugelgelenkes (Führungsgelenk einzeln) ist spezialisierten Werkstätten aufgrund der Vernietung möglich (MB verweist auf kompletten Lenker). Bremsscheibe innenseitig an der Radnabe. Für Felgen 6 1/2 x 14" ET30 oder 7 x 15" ET25 (SA11186/03).

Radaufhängung "spät": obere Lenker massiv, Kugelgelenk nicht austauschbar (Zerlegung herstellerseitig nicht vorgesehen). Untere Lenker und Radträger in Konstruktion und Geometrie geändert. Bremsscheibe außenseitig an der Radnabe. Für Felgen 7 x 15" ET25.

Fahrwerksfedern R/C 107 und weitere Typen

Voraussetzung für die richtige Wahl von Fahrwerksfedern:

Fahrgestellnummer

Bestimmungsland (Landesausführung)

Fahrzeugausstattung

Klimaanlage
 Klimaautomatik (andere Bewertung als Klimaanlage)
 Stahlschiebedach, elektrisch (Cpe)
 Automatikgetriebe
 Zusatzheizung (Standheizung)

Batterieposition Kofferraum

Anhängerkupplung

Autotelefon

Notsitzbank (SL)

Katalysator

elektrische Fensterheber

Airbag

Stahlblech-Unterschutz

Einige der oben genannten Ausstattungen gehören abhängig von Typ, Baujahr und Bestimmungsland zur Serie, wir bitten trotzdem um Angabe der Daten.

Der Bewertungsschlüssel hat sich im Laufe der Bauzeit der R/C 107 verändert, so dass eine Tabellendarstellung nicht möglich ist. SLS GmbH bietet Federn an, die von OEM Federnherstellern nach europäischen Standards in Bezug auf Gewähr und Fertigungsgenauigkeit hergestellt werden.

Aktuell produzierte Federn können in einzelnen Kriterien (ungespannte Länge, Drahtdurchmesser oder Windungszahl) von alten Federn abweichen. Hauptkriterien sind Federrate und Länge bei Normalbelastung. Schwankungen dieser Größen werden bei den verschiedenen Herstellern unterschiedlich (Farbstriche) gekennzeichnet und ein Ausgleich durch Variieren der Gummizwischenlage kann sinnvoll werden.

Gebrauchte Federn oder neue Federn mit Einbauspuren können nicht zurückgenommen werden.

Bitte beachten Sie, dass einige Stoßdämpfersorten (insbesondere neue Gasdruck-Stoßdämpfer) eine eigene Vorspannung besitzen, die auch Einfluss auf das Fahrzeugniveau hat.

35.g Info drive shafts

Prinzip 1: populärste Kombination
 älterer Gebrauchtzustände:
 Welle mit Stern Gelenken
 an Achsen mit Seitendeckeln.
 6-Lochdeckel bei kleineren Motorisierungen,
 8-Lochdeckel bei V8. Verwandtschaften mit
 Strichacht, 123 und 116

Prinzip 2: Ringgelenk-Welle
 an Achse mit Seitendeckeln,
 späte 107 V8, Verwandtschaft mit W126.
 (best zutreffende Werkstatt-Literatur).
 Ringgelenkwellen flossen in die
 Reparatur und Serie als Ersetzung
 für die Stern Gelenkwellen ein.

Prinzip 3: Achse
 ohne Seitendeckel,
 Verwandtschaft mit W124.
 (best zutreffende Werkstatt-Literatur)

40,41 main prop shaft, wheels

R/C107 were factory-equipped with the tire width 205mm, until 1985 with height 70 on wheels 6.5R14, from front axle MOPF 1985 with height 65 on wheels 7.0R15. The technical axle relationship before 1985 with W115/116 and from MOPF 1985 with W126, always pitch circle 112/hub66,5 holds out the prospect of mounting larger accessory wheels with parts certificates, however, there are neither ABE nor MB approvals for this, but the very tight space conditions at the front must always be checked by a technical inspection center for registration. .Please note that wheel bolts must be compatible with the rim, for this there are SLS-Youtube videos and a catalog table in <https://www.sls-hh-shop.de/main/de/mercedes-w111-w108-w114-/40-radbolzen-nach-gesamtlänge> The Hardy disc table shown here is valid for factory combinations of transmissions and axles: Unit conversions may entail adjustments to the cardan shaft.

40.c Rims and wheel bolts

With a special focus on R/C107, here is a tabular comparison of compatible axle generations, replica rims and wheel bolts. Maxilite and CWDenm. (ClassicWheelsDenmark) are currently leading reproducers of the old rim designs. Follow the respective lines to the right to the compatible wheel bolts. Wheel dimensions in inches width x inches in diameter, 6-digit numbers are SLS catalog numbers, 10-digit numbers can be MB spare part numbers with former or current validity. Rim details such as offset, photos, documents, set containers can be accessed by clicking on the blue digits. In the SLS catalogue figure <https://www.sls-hh-shop.de/main/de/mercedes-w111-w108-w114-/40-radbolzen-m12-nach-gesamtlaenge> there is a bolt line-up sorted purely by length and going beyond the model 107. Axle generation Rim design Dimension Manufacturer rim SLS no. Bolt SLS no. / alternative

Achsgeneration	Felgdesign	Abmessung	Hersteller	Felge-SLS-Nr	Bolzen SLS Altern.

		8 x 17	Maxilite	940818	740007 740414, ..	
		9 x 17	Maxilite	940819	740007 740414, ..	
		(Aero: das ursprüngliche Design verbreitete sich durch AMG Ende der 1980er Jahre als Zubehör bei W126, 129, 124 .. und wird wegen Passung zur späten SL107-Achse hier erwähnt. Alle Räder außerhalb der sehr begrenzten MB-Freigaben sind eintragungspflichtig.)				
						

Penta: The design dates back to the days of the MB C111 and cross-brand motorsport equipment. It represents contemporary accessories in the R/C 107. Aero: The original design was spread by AMG at the end of the 1980s as an accessory on models M126, 129, 124 and is mentioned here because of its fit with the late R107 axle. All bikes outside the very limited MB clearances are subject to registration.

Brake systems rear axle

Schräglenker Gen.I, selten erhalten:
Zwischenleitungen an Sätteln (104),
Halter für Schlauchübergang,
Verteiler+Leitung an Heckboden

Schräglenker Gen.III, populärste
Variante: Schläuche direkt an Sätteln,
Verteiler+Leitungen am Querträger

Typen mit Ausstattung
„Koppellenker“: Sättel vor den
Radnaben, Schlauchübergang
hinten an Zusatzhalter

42.h rear ropes parking brake

The large number of rear brake cable variants is unfortunately the result of the equally varied construction environment: - Change of the expansion levers in the anchor plates from approx. 12.'74 (new ropes with clevis) - Relocation of the train rocker at the cardan tunnel from approx. 09.'76 (relocation to the rear edge of the tunnel) - Variants coupling or semi-trailing arm axle (can be extras, not necessarily according to VIN, when the coupling arm axle was installed, identical leftright ropes could no longer be used) - Variants Coupe/Roadster Unfortunately, only a small part of the formerly assigned part numbers for various rear brake cables are still available: Please check with a Type 107 specialist to see if replacement is possible by adjusting other parts. (Modification of the rocker, replacement of the spreader levers)

42.e Info Axle-type Brake hoses

42.e Info Axle-type Brake hoses

Bremsschlauch-Anschlussweise Hinterachse

Beispiel Ausf. II: Schlauch direkt an Sattel
II

Bild rechts oben: erste Generation, Hinterachse mit einfachem Lenker/Radträger (hier W114), kurze Bremsleitung führt oben zum Sattel, --> **Bremsschlauch nicht direkt an Sattel**. Nur bis ca. 033.73. Achtung: bei Erneuerung des Bremssattels wird ersetzt in die nachfolgende Bauweise (dann mittlere Bildreihe)

Bildreihe mitte: Hinterachse mit einfachem Lenker/Radträger (hier 300SL und 280SL), Bremssattel hinter Achsmitte mit seitlichem Anschluss. --> **Bremsschlauch direkt an Sattel**.

Bildreihe unten: Achse m. „Koppellenker“ (hier 500SL + 500SE). **Bremsschlauch nicht direkt an Sattel**, sondern Extraleitung zur Sattelposition vor der Achsmitte. Schnelle Erkennung: Lenker aus Leichtmetall mit auffälliger Wabenstruktur.

Ersatzteilillustrationen berücksichtigen meist nur eine der drei möglichen Leitungsschemas. Wenn eine Koppellenker-Achse verbaut ist, sitzen die Bremssattel vor der Achsmitte.

47 Gas Tank and Fuel Pump

47.b Pump packages between 1976 and 1985

Picture for the years of construction 1976 to 1985 (K-Jet with single pump): with numerous small changes, the pump environment was gradually developed: - after replacement of the D-Jetronic: installation of a pressure accumulator (behind the filter) - Use of in-line pump (replacement of the pump with transverse outlet) - Arrangement changed: accumulator turned and pipe connection parallel to the filter - Pressure compensation line with valve added, pressure side of the accumulator only one connection - Non-return valve on the pump pressure side (later included in the scope of delivery of all pumps) - Pressure compensation line with valve omitted again - cross-section of the suction side enlarged, affects the pump, suction hose and suction damper (nozzle larger, housing diameter smaller), as a result, the connected hoses are also different. Pump holder and cover changed several times. All changes to the filter were environmentally compatible, the latest version fits all of them, but diameter adjustment before ordering is strongly recommended. When ordering the other components, the execution must be viewed beforehand. Hoses sold by the meter are supplied without a protective cover or insulation.

47.a Fuel System 1971-1976

Tank: the body environment remained almost unchanged over the construction period, so that the choice of the right tank generation could be based on the available immersion tube sensor or upgraded to the latest generation with the help of the surrounding parts. Please plan for freight costs. Roadster and coupe tanks (and fuel gauges) are not interchangeable. The horizontal SL expansion tank was changed from sheet metal to plastic at an early stage, a rare first generation of tanks came with only one ventilation nozzle (later all tanks 5 nozzles). Meanwhile irrelevant: The filling pipe barrier against leaded nozzles as a catalytic converter retrofit additive is obsolete and the cross-section is basically tuned to lead-free in a simplified way. Locking lids for types without central locking can be requested with delivery of documents from MB with desired locking. Pump package: this illustration is valid for types D-Jetronic, version without evaporation system, pump package without pressure accumulator, if original pump is installed, recognizable by the side pressure outlet. Due to the poor delivery situation, conversion to more modern pumps (inline design) is popular, so that assembly parts can differ individually, see illustration of more modern types. Use K-Jetronic 4.5 US already 09.'75. Fuel gauges: fluctuating delivery situations and weaknesses in reproductions may suggest a request from professional overtakers. The design generation change was carried out without any influence on the electrical function, there is a sls-hh Youtube video for pin assignment and pre-fault encirclement.

54.e Battery mounts, front or trunk

Batterie im Kofferraum ab 08.'74 für USA-450SL/C (Roadster ab FG..021762, Coupe ab FG..008203) in Verbindung mit "USA-Abgas75", nachfolgend alle USA-V8 (380 bis 560), oder als Sonderausstattung SA 56200 auch in weiteren Modellen. Neben der tieferen Kofferraum-Blechmulde gibt es mehrere Einschweiß-Halter, die an den Karosserien abweichen, zB. Wegfall / Änderung von Haltekonsolen auf dem vorderen Längsträger. Heckbatterien 100AH mit niedriger Wunschbauhöhe (175mm) sind mit Platzreserve passend, populäre Ersetzungen mit Höhe 195mm können am abgerundeten Originaldeckel zu Gewaltschäden führen: die Instandhaltung des geschlossenen Kastens kann TÜV- Relevant sein wegen seiner Haltefunktion und Fernhaltung der Lade-Gase.

79 a Hardtop Storage

79 a Hardtop Storage

Hardtop-wagen
R113, R107, ...

Einfache Montage, schlagfeste Beschichtung (in weiß oder schwarz), robuste Rollen, arretierbar, solide Schaumpolster m.Filzschicht,

dazu erhältlich:
Textilcover 779985

schwarz: Art. [779980](#)
[779981](#)

Hardtop-Unterbringung
Garagenlifte
Abstellwagen
Staubhüllen

Hardtop Storage
Hoists, Carts, Covers

Hardtop-Cover Art. 779997

2-teilige Hülle
passend zum Garagenlift
- einfache Montage (Klettverschluss)
- das HT wird auch von unten umhüllt

orig. Garagenlift Art. 779999

Mercedes-Benz Originalzubehör:
Seilwinde mit Handkurbel,
"T-Traverse" an Verschlüssen vorn
und Haken unter Rahmen hinten

Garagenlift
Traverse mit Regenrinnenhalter
Gurt zur Absicherung
Flaschenzug, Haken und Klampe

82. Headlamp Euro H4 and Parts

82. Headlamp Euro H4 and Parts

Depending on the equipment of the dashboard, the headlight variants "with adjuster wheel for headlight range control" or "without adjuster wheel for headlight range control" must also be installed in the angular Europe design. The catalogued individual spare parts have corresponding designations for the respective type "with range adjustment (LWR)" or "without range adjustment (ohne/without LWR)", where this is relevant for compatibility. Unless otherwise indicated, the parts catalogued here are for right-hand traffic = left-hand drive, this applies to main reflectors,

diffuser glasses and complete units. When dismantling the round US double lamps (= conversion), the headlight and wiring harness are required completely in the variant without LWR, no components of the US equipment fit on the Europa headlight (sockets, base plate, el-plug). Bulbs and rivets (36) please don't forget in case of conversion, there is an SLS video. <https://www.youtube.com/embed/97libl5LQII>

88 Attachment Body Parts: Front and Bumpers

88 Export Bumpers, large

In 1974, the U.S. export bodies received reinforced bumpers and modified mounting mounts on the vehicle frame. The core of the design are the impact dampers shown in the picture No. 33 and 73: the energy-absorbing immersion of the bumper requires a slide guide on the side, which also differs from the small standard bumpers.

88 Bumpers, european

All parts shown (except special holders, click areas 145 and 140) are compatible with the small standard bumper of the normal Europa models. If you wish to convert large US bumpers to small Euro bumpers: Please keep in mind that no "plug and play" solutions are possible, as the bodysells have differences in the areas of the connection points. We will be happy to put together offers for you that provide information about various set-up options. Assembly instructions are not available, advice from specialized companies is recommended.
